

## OSCR

OSCR is a configurable screensaver, showing data from your MS-Outlook like the last mail, tasks and appointments.

You can design the screensaver in a proper way.

OSCR supports systems with multiple displays.

### **System requirements**

OSCR deals with XP, Vista and Windows 7. You need the .Net-Framework 4.0.

OSCR supports all Outlook-versions fro 2000 to 2010.

Outlook-Express is not supported.

There is a 32-bit-Version and a 64-bit-version. Which version is needed, depends on the installed MS-Office-version, not on the operating system.

### **Installation**

During the setup OSCR will be installed on a directory, choosen by the user.

Click-right the File „OSCR.SCR“ and choose „Install“ for the Installation as screensaver. By clicking on “Configuration“ in the screensaverdialogue you can define the design as you want.

## Configuration

On the screen are different tiles defined.

There are following tiles:

- Mail - shows the last mail and the number of unread mails
- Task - shows a list of tasks
- Appointment - shows a list of appointments
- Clock - shows the current time and the current date
- Picture – shows a slideshow with pictures from a local drive
- Reminder - if you had defined a reminder in outlook, it shows the same

For the Configuration there are different recurring elements.

These elements are:

- Caption - a fixed defined text
- Item - a text, filled by Outlook
- Icon/Picture - an icon or a picture
- Itemlist - a list with entries from Outlook
- Picturelist - a slideshow
- DateTime - display of date and time
- Sound - you can add a sound to the remind- and the new-mail-event
- System - system parameters
- Tile – define the location,size,color and the screen of a tile

You have to save the changes, when you change the element.

With „Set Defaultvalues“ you will create a set of default values in metro-style.

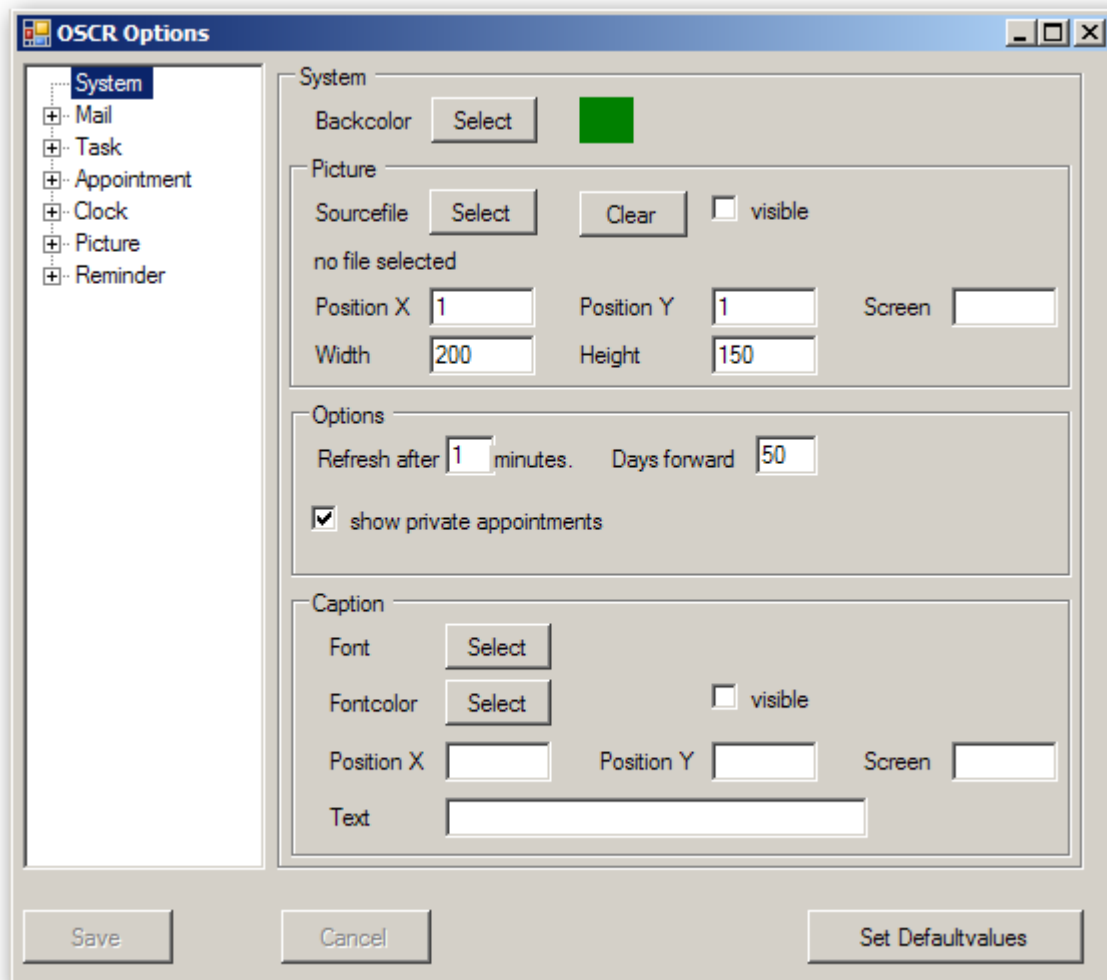

### Notes:

The textbox „Screen“ requires a numerical input, „1“ means the first display, „0“ means all Displays.

If there is no sourcefile selected and you check „visible“, then the defaulticons will be shown.

The „Clear“-button resets the selected path or file to empty.

## System

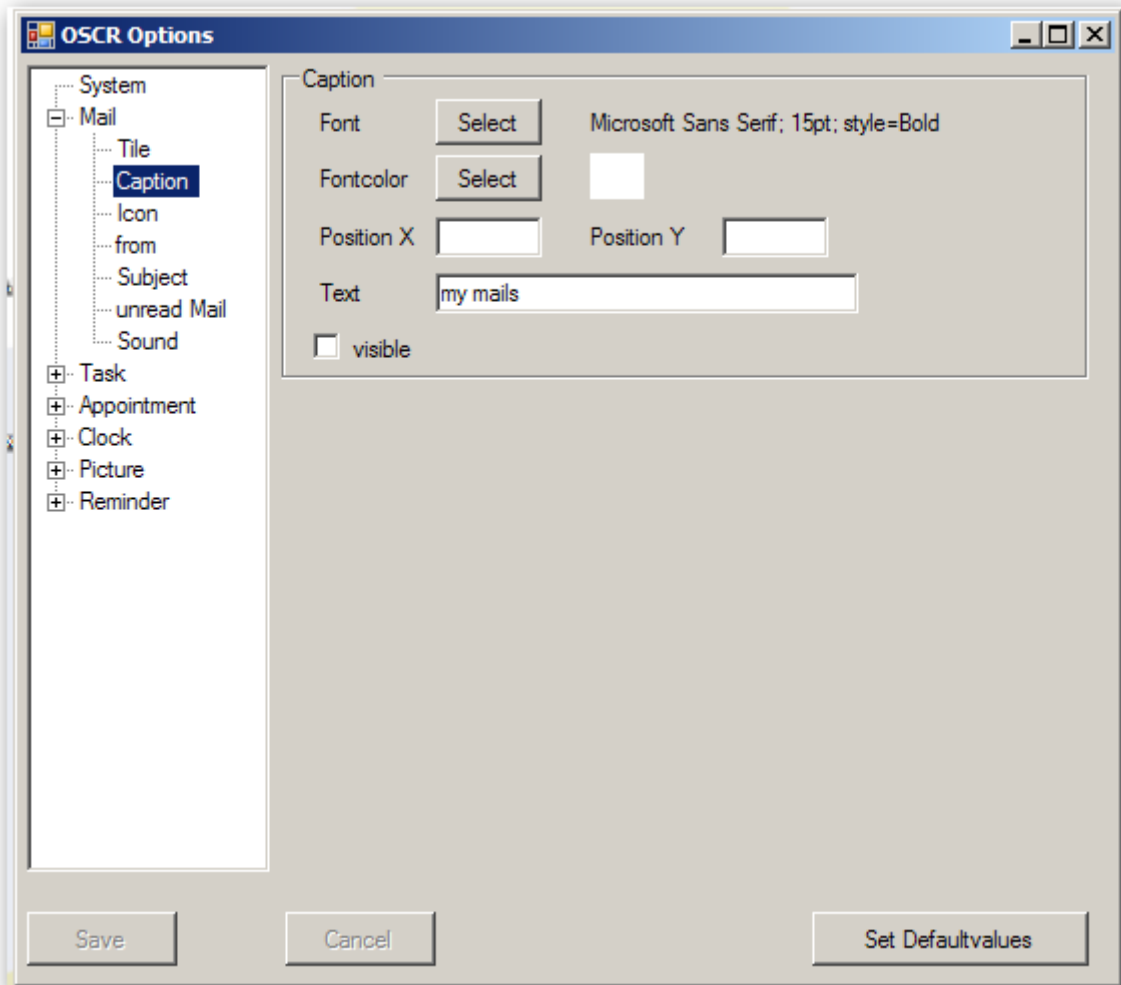

Backcolor	backcolor of the screens
Picture	choose a picture or icon, define size and position, define the visibility and the screen
Options	interval to read from Outlook in minutes number of days to look forward for appointments visibility of private appointments
Caption	define the text, its position, font, screen and visibility

## Tile

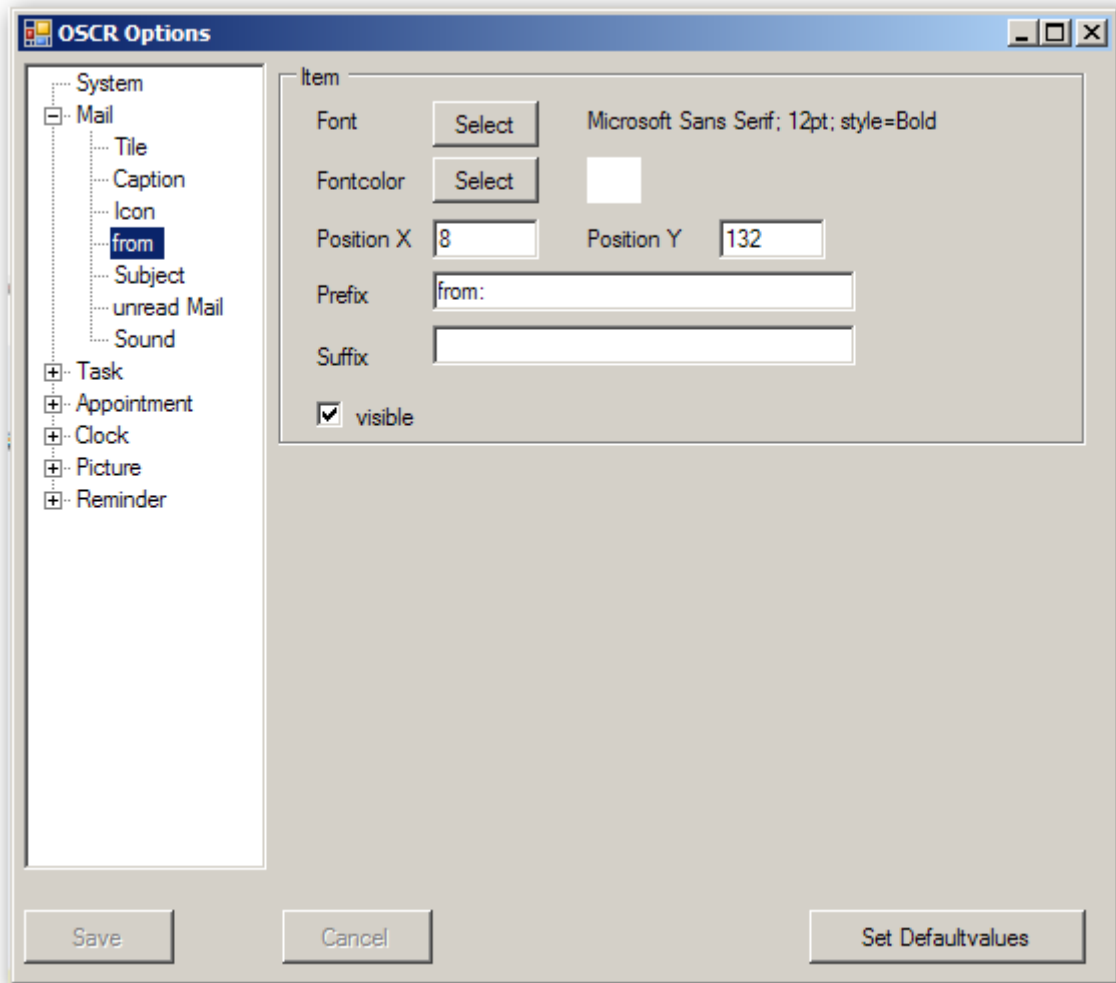

Backcolor	backcolor
Position X	position in width in pixel
Position Y	position in height in pixel
Width	width in pixel
Height	height in pixel

## Caption

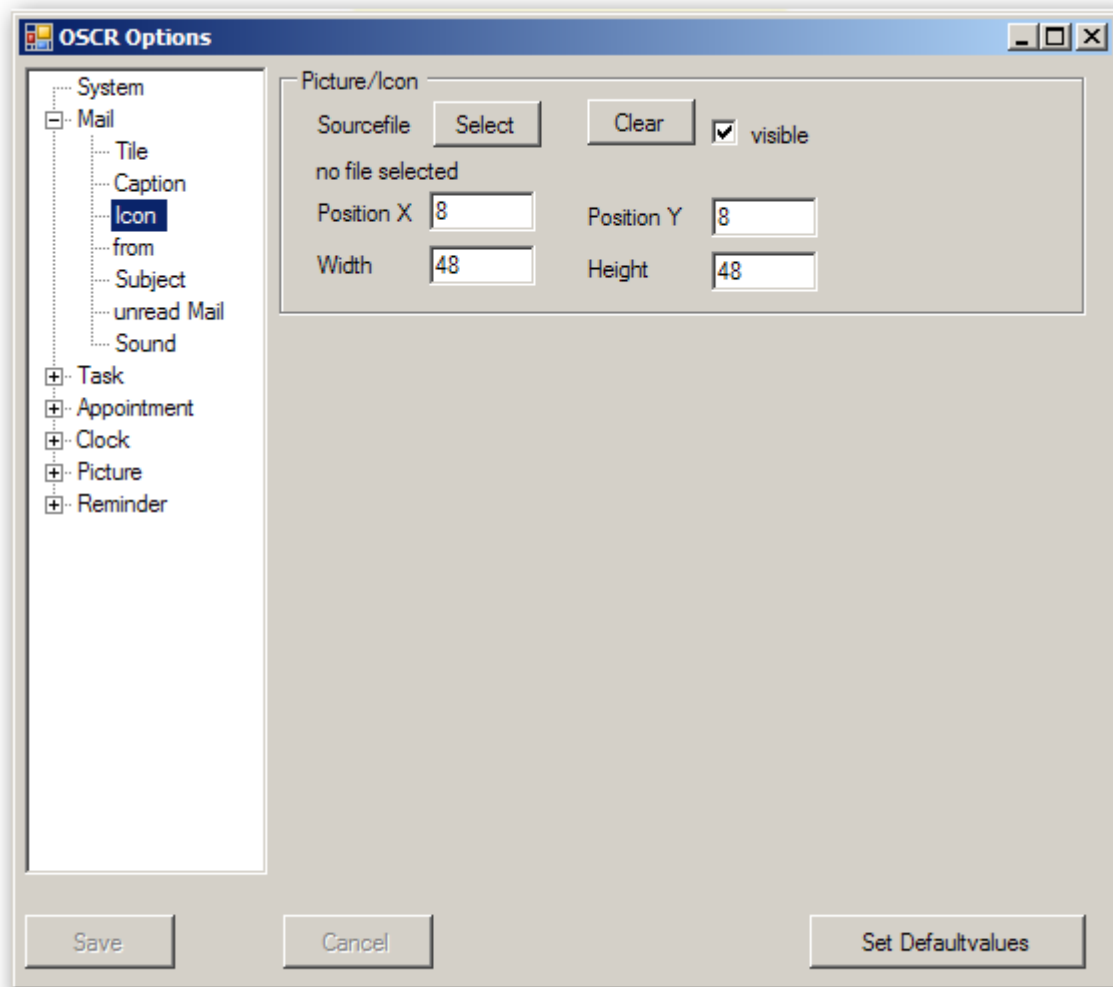

Font	font
FontColor	fontcolor
Position X	position in width in pixel
Position Y	position in height in pixel
Text	text
visible	visibility of the text

## Item

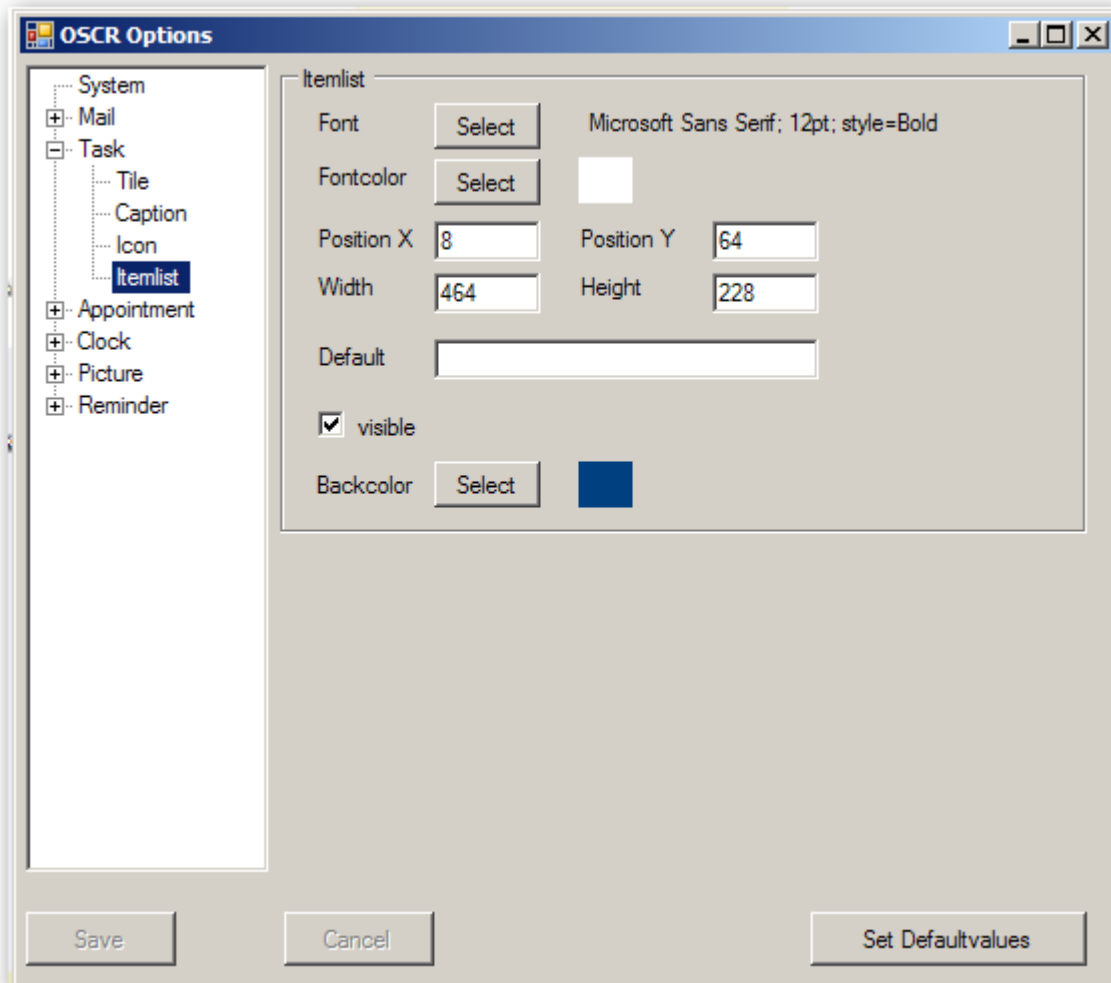

Font	font of the text
FontColor	fontcolor of the text
Position X	position in width in pixel
Position Y	position in heigth in pixel
Prefix	fixed text before the itemtext
Suffix	fixed text after the itemtext
visible	visibility

## Picture/Icon

Sourcefile	fullpath of the picturefile
Position X	position in width in pixel
Position Y	position in height in pixel
Width	width
Height	height
visible	visibility

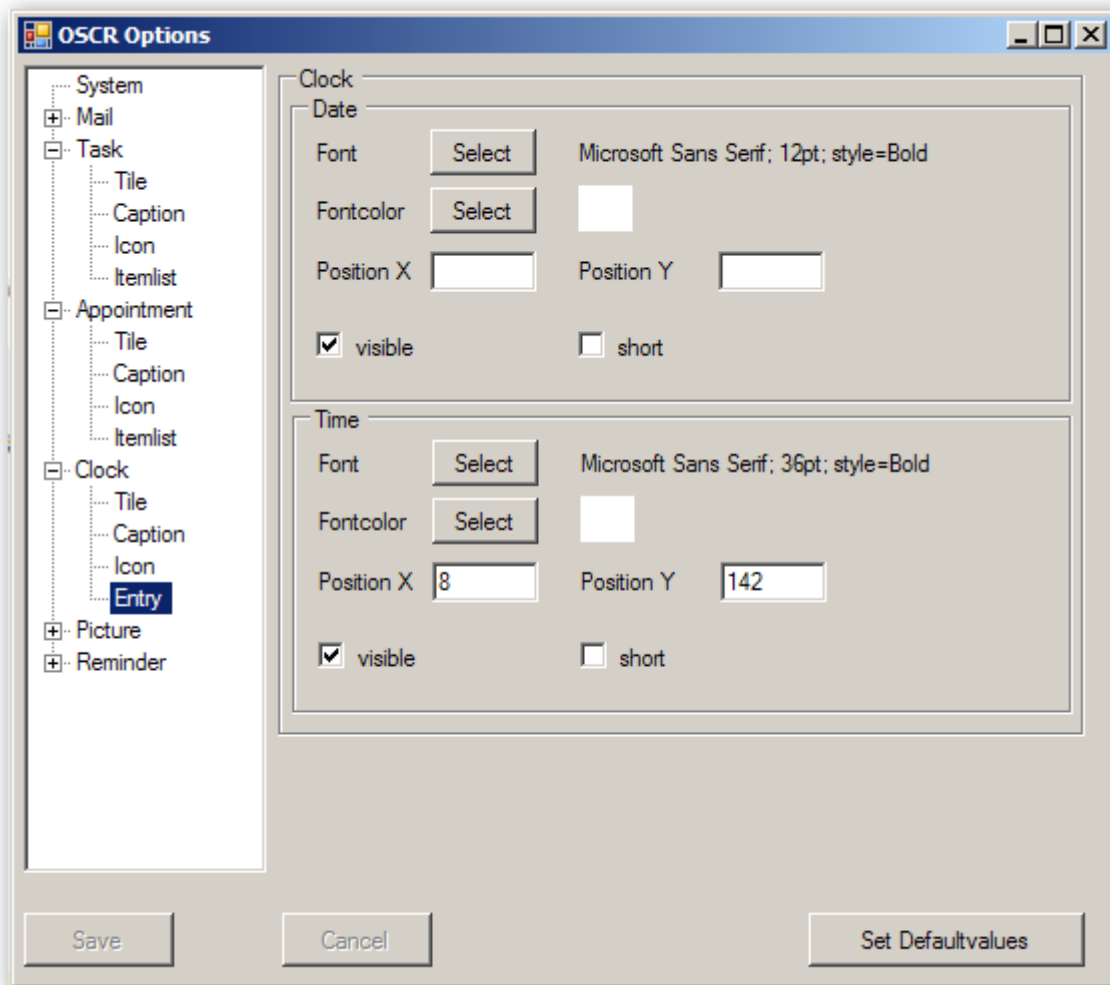

## ItemList

Font	font of the text
FontColor	fontcolor of the text
Position X	position in width in pixel
Position Y	position in height in pixel
Width	width of the list
Height	height of the list
Default	text shown, if the list is empty
visible	visibility
Backcolor	backcolor of the list

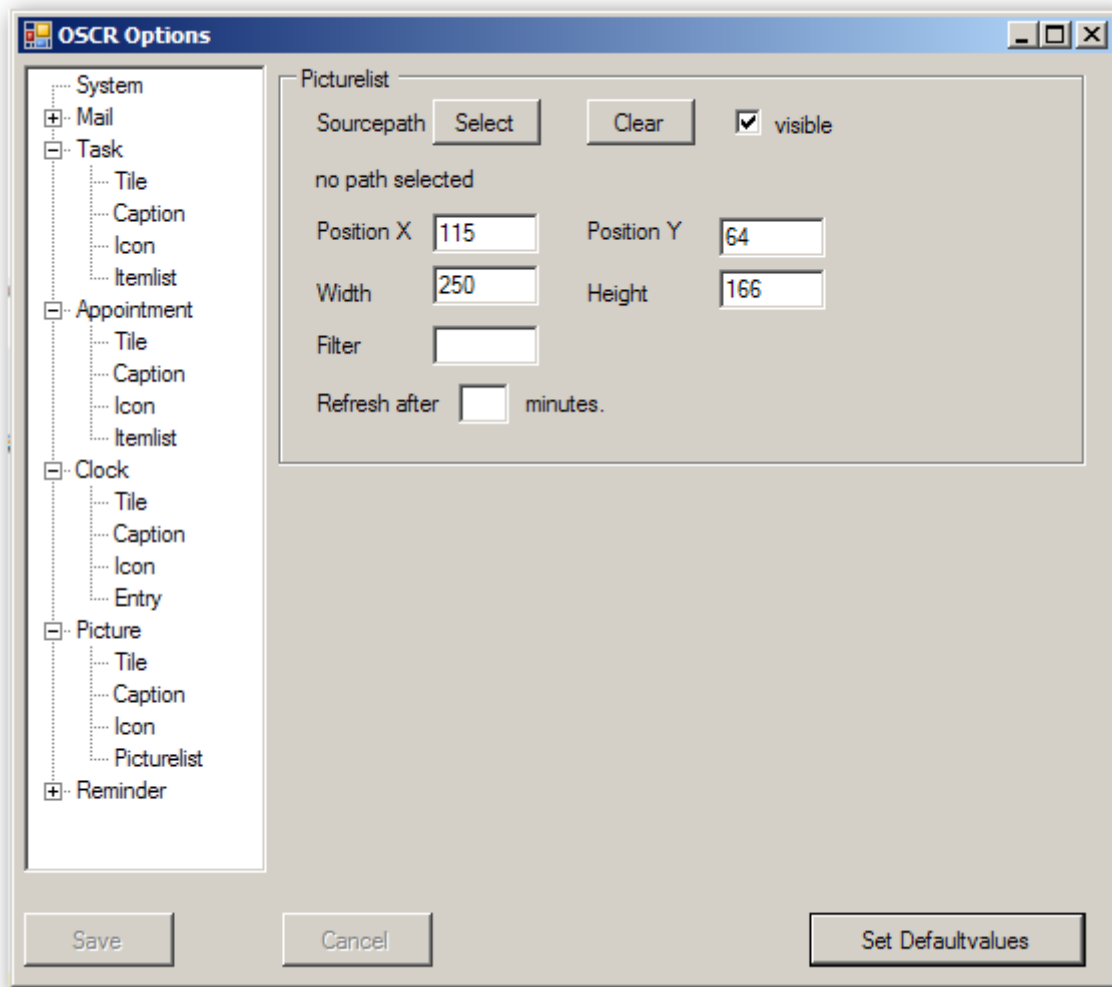

## ClockEntry

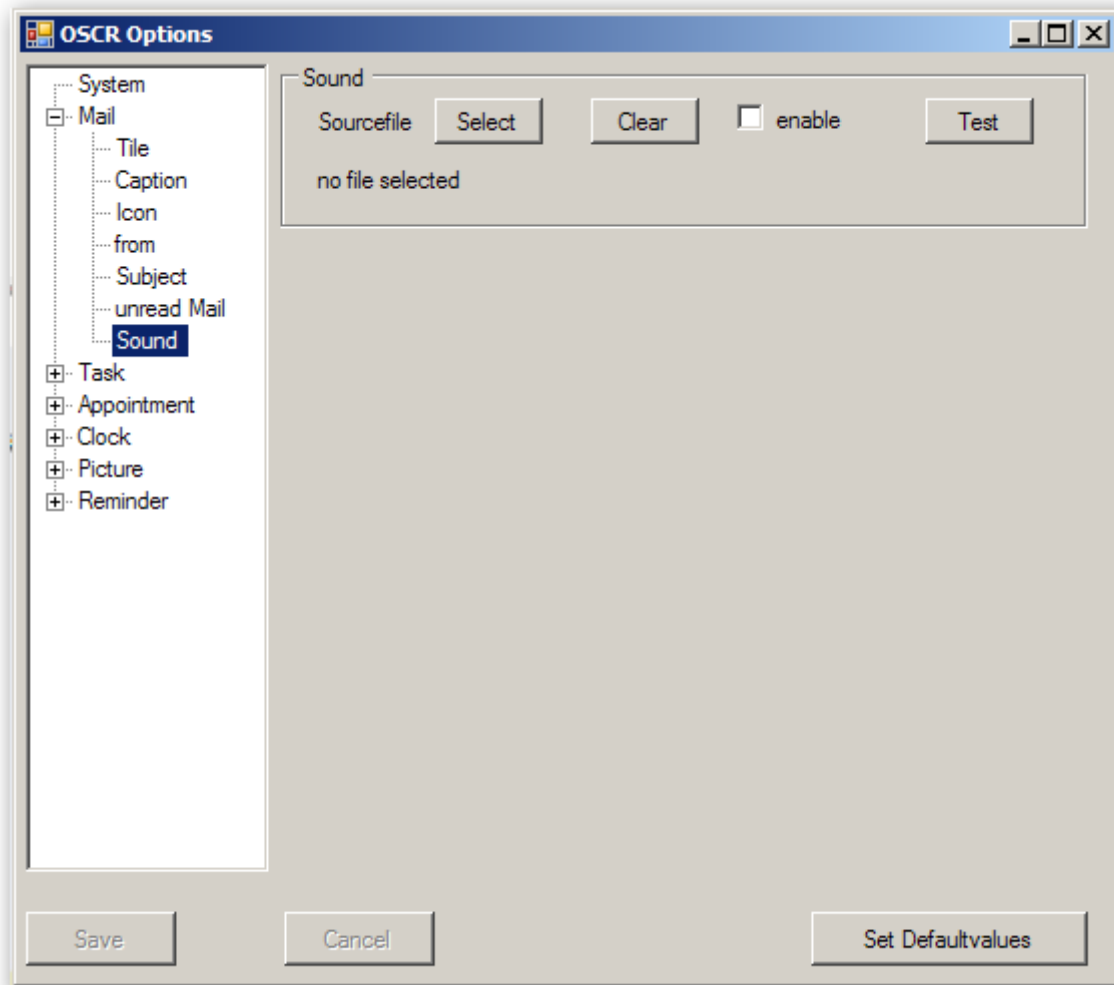

Font	font of the text
FontColor	fontcolor of the text
Position X	position in width in pixel
Position Y	position in height in pixel
visible	visibility
short	short or long style of date or timet

## PictureList

Sourcepath	local directory with the pictures
Position X	position in width in pixel
Position Y	position in height in pixel
Width	width of the list
Height	height of the list
Filter	filter for the fileselection like this : „*.jpeg .png“
visible	visibility
Refresh	delay of a picture in minutes

## Sound

Sourcefile	fullpath of the wav-file
enabled	sound is enabled/disabled
