# Introducing TimeOrg

version 3.4.5.2 Release date: February 21, 2014

What's new: count-down timer alarm bug fixed

---

## IMPORTANT:

If you update, please first shutdown "TimeOrg" application.

DO NOT change the installation path, otherwise the software may not function correctly and you will receive error messages.

You may change the path, ONLY if your system drive letter is not C:\ , e.g.  
D:\Program Files\Asman\Timeorg

**This software was tested on the next software/hardware configuration:**

**Intel CPU 2.13GHz, 2GB RAM**

**Some functions may not work on Win98 & Windows7**

**Sometimes explorer.exe crashes for different reasons, including windows and applications bugs, incompatibilities, viruses, hard drive problems, etc.**

**Usually, when this happens, some icons from system tray can disappear.**

**To restore TimeOrg icon in your computer system tray, just use "Restore TimeOrg" shortcut from desktop.**

---

## *TimeOrg is an application that allows you to:*

1. Set up to 35 alarms with text notes ( maximum 225 characters ), default or custom sounds (wav, ogg, wma), or even text-to-speech(en) option to read alarm notes.
2. Restart, Hibernate, Log off or Shut down computer at specified time.
3. Run any file at specified time, or at startup (one time only).
4. Set one startup alarm (one time only).
5. Display windows start & lapsed time.
6. Set own or random skin colors, save & load skins.
7. TimeOrg can connect your PC automatically to internet (dial-up, ADSL). (only if the option "Always dial my default connection" from Internet Explorer-Tools-Internet Options-Connections is selected).
8. Able to check every 1 - 240 minutes if a specified web page have changed/updated. This feature require that check\_webpage.exe file to exist in C:\Program Files\Asman\Timeorg location.

( Note: Not any web page type may be successfully checked.)

9. Automatically change wallpaper ( cycle: 1, 3, 5, 15, 30, 60 ,120, 240, 480, or 960 minutes )
10. Automatically capture and save screenshots ( cycle: 30 sec, 1, 2, 3, 4, 5, 10, 15, 20, or 30 minutes )
11. Automatically backup file (single backup or 3 sequential backups - 1, 2, 3, 4, 5, 10, 15, 20, 25, or 30 minutes )  
( is NOT recommended to backup files over 50 MB in size )
12. One click to wake up at 1-59 minutes.
13. Large memo-note box, optionally run a file when your computer is idle.
14. Optionally notify you when the connection is on and off.
15. Day reminder mode alarm (up to 30 days)
16. And much more features...

## Version History

**What's new in [TimeOrg 3.4](#): July 1, 2013**

· showing some non-recurrent alarms (saved in days 1,11,21,31), as recurrent alarms - bug was fixed

**What's new in [TimeOrg 3.3](#): May 26, 2013**

· added initialization module to prevent Windows to hang during TimeOrg startup

**What's new in [TimeOrg 3.2](#): March 15, 2013**

· restore application window from tray icon - bug fixed

**What's new in [TimeOrg 3.1.8.2](#): November 1, 2012**

· after returning from "Hibernate" the current day&month won't update - bug fixed  
· when save a normal (non-recurrent), alarm after you select one recurrent alarm, day value is saved as 0 - bug fixed;  
· improved selection & delete alarm system;  
· in certain circumstances, the TRIAL version may expire after 1 day - bug fixed;  
· improved "Restore TimeOrg" command;  
· file creation error message - bug fixed;  
· minute keyboard shortcut bug - fixed;  
· option to pop-up TimeOrg window when alarm starts;  
· minor GUI changes

**What's new in [TimeOrg 3.1](#): October 7, 2012**

- the user may have difficulties to save an alarm when the alarm time value is less than current time - bug fixed;  
- when user clicks a date in the built-in calendar, the saved date value of the alarm remains the same as the current date - bug

*fixed;*

- the "expired hour and minute" limitation has been removed;
- the selected date for the alarm resets to the current date too quickly - bug fixed;
- other improvements and bug fixes

**What's new in TimeOrg 3.0: October 3, 2012**

- new redesigned, more intuitive GUI
- backup file function bug - fixed
- built-in 8 interchangeable skins
- other minor changes and bug fixes.
